Education

Saratov Y. A. Gagarin state technical university,
IRBiS, Information systems and programming faculty / 2010

About me

I possess first-hand teamwork experience as a JavaScript, HTML, and CSS coder in a product-based company with high layout complexity requirements. I worked as a frontend developer in an outsourcing company dealing with highload projects for large companies with thousands of visitors. I also participated in project coverage with tests. I have experience working in a fintech companies. I took part in the development of an online casino and gained valuable experience in using modern frontend technologies. My experience includes developing and maintaining an enterprise projects solo.

Now I am looking for interesting career development opportunities and continue to work on my mastery of JavaScript, as well as English.
